Thanks Brett...

Yes, that is what I meant in saying “a” source document... and not “the” document. Further, had it been “the,” you would have seen all caps, etc.!!!!

Sorry that is all that was in the folder...

George

Thanks George. I looked at the scans which, unfortunately, do not clarify the aquifer exemption matter. The “Mtg Memo” relates to the 1985 letter that we reviewed, but it does not address the exemption issue.

Michele, are there additional paper documents we should look at?

Thanks George. Either Alexa or Brett can come by and get the documents. Thanks!

fyi,

This was something that was not “clear the clutter’d” as I saved this folder of “old” material for later examination.

I found the attached scans which includes a source document for the later decision from Region 9 from Regional Administrator Covington (see “Mtg Memo - Classification Oil Field Waste Streams 3-8-1985 StateRgBd with EPA R9 and WOGA”).

I was not clear – or did not remember that initially (at least the first year of primacy) the State Water Resources Control Board was the recipient of the UIC Primacy Grant. It is possible that they were involved in the initial round of determinations & documentation of some decisions.

Who should get this folder first?

George

The DOGGR files sent to the RRC are in my office. Brett and I have already looked thorough them. WE need those other three boxes if they were not destroyed in 2002.

So, what/where do we begin to search for this? They were set for destruction.

I will look through the DOGGR files that I sent to the RRC, just in case. I recall that there was a purge before those got boxed, although I was assured that the purged material was not anything fitting the description of the material we are searching for, i.e. letters, etc.

Thanks Liz and George for the prompt replies. We figured it was a long shot, but worth asking.

No such recollection. I agree about the interesting list in those boxes.

Hi Liz and George,

Please examine the attached box list and let us know if you have any recollection of what the disposition of these 4 boxes were. In particular we are interested in the contents of boxes 1,2 and 3. The box lists do not have accession numbers so there is a question as to whether they were even sent to the FRC.

Thanks!

Michele

In addition, we should talk to George, and especially Liz, regarding any recollection they may have of box whereabouts since they both signed the sheet.

Regarding the ones we are looking for (Boxes 1,2,3) Uedico just reported that Marilyn Kline was not able to find a copy of the box list in the 1996 binder. That may mean a couple of things – that it was never sent to FRC or by the time it was ready to be shipped to FRC it was disposed of if that was at the time of the disposal date. Marilyn is calling the FRC for us to see if it's in the FRC inventory. If it is not she is also checking with Terry to see if it's in some water division list or if it might have been combined with other records.
